

### 1ER CRU «LA MARÉCHAUDE»

Locality (under 1er Cru banner): La Maréchaude, En Ouche, Le Nambret

Origin of the name of the climat and place-names, explanation of the grouping: Located just under "les Crays," this climat can be divided into two distinct parts as it is bisected by the road: an upstream section and a downstream section. The easternmost part descends all the way to the river.

Special feature of this 1er Cru: There is said to be a spring that flows: La Marre Chaude, which flows into the stream in a bend. Spectacular temperature variations. Legend has it that a bourgeois woman used to bathe in the hot springs...!

Organoleptic profile: Solar, precise, and seductive (or fleshy).
