

### 1ER CRU «LES CRAYS»

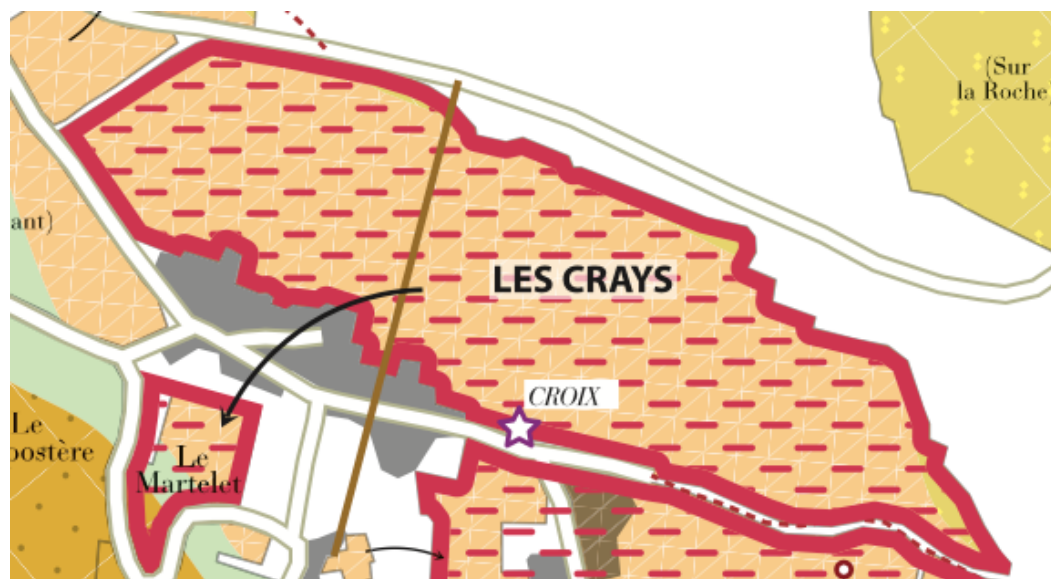

Locality (on 1er Cru): Les Crays, Le Martelet

Origin of the name of the climat and place-names, explanation of the grouping: The name is related to stoniness, much like "Cras," signifying the accumulation of rocks and scree. Small pebbles and small plates of rock, especially at the lower part.

Special feature of this 1er Cru: The highest in the appellation. Well-ventilated area with well-draining soil thanks to the scree.

Connection with the legend of the beast Faramine: Fabulous beast that terrorized Solutré and Vergisson, eventually defeated by hunters; once killed and plucked, it is said to have been cut up in Martelet Square. When it took flight, it reached both Roches, indicating its impressive wingspan !

Organoleptic profile: Sun-kissed wine with chalky aromas.

- Area: 10 hectares and 75 ares
- Locality: Vergisson
- Soil: Brown limestone slope soils, very rocky, deep, non-compacted, on blue clay.
- Altitude: 320 to 400 meters
- Exposure: South orientation
- Slope: 15 to 20% grade.
